

Cabinet interface device

The Click 656 provides support for SmartSensor Matrix and Advance in one compact case. This module communicates directly to the controller through SDLC, and supports contact closure devices as well. It also provides power, surge protection, and Ethernet connectivity for all sensors.

- Provides power, connectivity, and surge protection for up to six SmartSensors
- Sends sensor detection data directly to controller through the SDLC port
- Can be used in place of Intersection Preassembled Backplates
- Has a power switch for each sensor, allowing you to turn sensors on and off individually
- Provides up to 64 detector channels via SDLC communications
- Can also be used to send sensor detection data to contact closure cards
- Provides an Ethernet port for network connectivity
- Has multiple configuration connections for communicating from your computer to the connected sensors:
 - USB
 - RJ-11 jacks for RS-485
 - DB-9 connector for RS-232
 - T-bus port
- Can be easily installed in standard 19" cabinet or used on a shelf
